Type of presentation* *(choose 1)* :   ☐   Oral Presentation   (เฉพาะ ตัวแทนนศ.ที่สาขาเลือกให้นำเสนอแบบบรรยาย)

☐   Poster   (กรณี นำเสนอผลงานปัญหาพิเศษ/การค้นคว้าอิสระ)

☑   Cooperative Education   (กรณี นำเสนอผลงานสหกิจศึกษา)

ABSTRACT

The development of a website for notifying the removal of workpieces from an oven has the objective of facilitating the transmission of notifications of completed baked workpieces to the central notification system, known as the Prompt Service Team (PST) system, while also storing baking data of workpieces and assisting in the large amount of information management within the baking process.

The website was developed on the basis of UX/UI principles, using Vue 3 as the primary language for front-end development and using JavaScript and Node.js for back-end development. The website was designed for running on both computers and mobile phones. The computer version is used for managing all baking data, while the mobile phone version is used for registering workpieces prior to the baking process.

*Type of presentation must be matched with an option you choosing on student upload system.

**The abstract can be more than one page and <u>must be approved</u> by project advisor before upload.
