## ABSTRACT

Wonders of the World refers to invaluable sites recognized as World Heritage by UNESCO. These locations are rich in civilization and historical significance remain standing today, while others have faded with time. This recognition aims to preserve these precious cultural legacies for future generations.

Main objective of this project is to design jewelry inspired by the Wonders of the World, capturing the unique identity of each location within the pieces. To explore the interests of Chiang Mai University students regarding these designs, an online survey was conducted with a minimum of 200 participants. The project features a collection of 5 pieces inspired by sites from the Medieval to the Modern eras. Currently, this project is in the process of creating a modeling stage using RhinoGold 5.0.

\*Type of presentation must be matched with an option you choosing on student upload system.

\*\*The abstract can be more than one page and must be approved by project advisor before upload.
