Company: Banana Coding Co., Ltd.

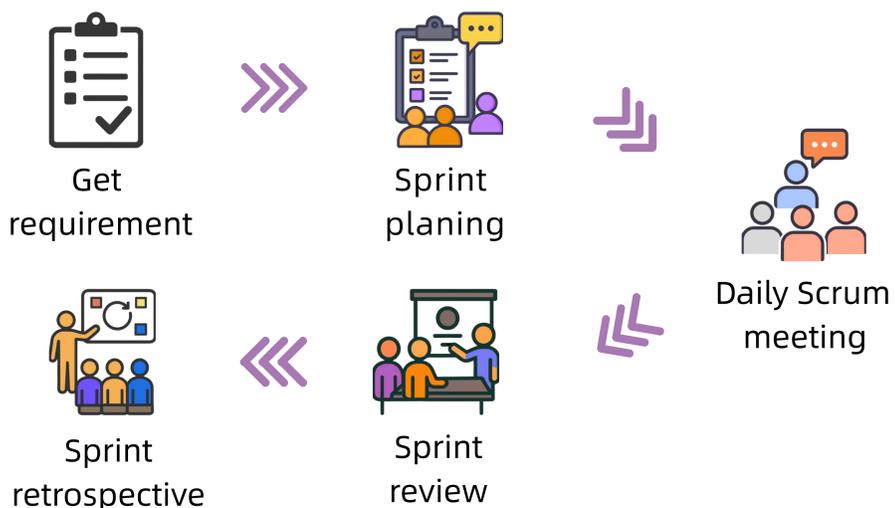

Abstract

This cooperative education project details the development of Banana Talent version 1.6, a web application designed to optimize employee and project management at Banana Coding Co., Ltd. Built upon the existing Ruby on Rails and Angular architecture, this upgrade addresses previous system limitations by enhancing the user interface and introducing advanced reporting capabilities, notably consolidated employee evaluations. By reducing administrative complexity and improving data visualization, the system provides highly efficient access to organizational information. Internal staff trials confirm that version 1.6 significantly improves overall usability and streamlines personnel tracking.

Introduction

This cooperative education project details the development of Banana Talent version 1.6 for Banana Coding Co., Ltd., a software firm specializing in modern mobile and web solutions. While the company's previous internal management system (version 1.5) was functional, it suffered from restricted reporting capabilities and an inflexible user interface that hindered administrative workflows. To address these operational bottlenecks, this project upgraded the platform to optimize personnel tracking and significantly enhance data visualization across the organization.

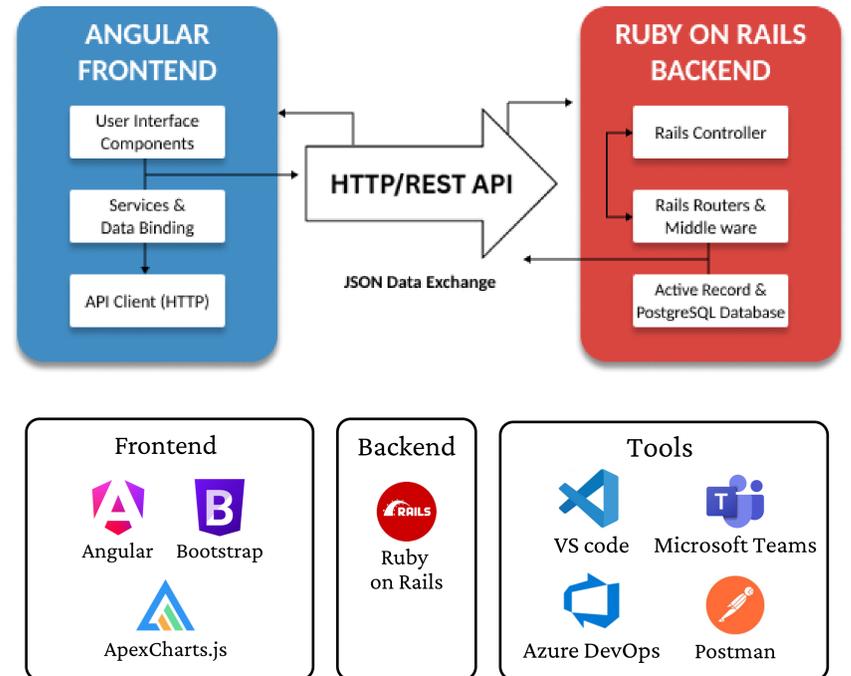

Methodology

Conclusion

The successful deployment of Banana Talent version 1.6 met all core project objectives by seamlessly integrating advanced reporting capabilities and a refined user interface into the existing Ruby on Rails and Angular architecture. By introducing specialized tools such as consolidated employee evaluations, the platform has evolved into a comprehensive management solution that drastically reduces administrative complexity. Feedback from the trial phase confirms that these strategic enhancements have streamlined data visibility and organizational access. Ultimately, Banana Coding Co., Ltd. is now equipped with a highly scalable and centralized system for managing its internal personnel and projects.
