

INFORMATION FOR AUTHORS

EDITORIAL POLICY

The **Chiang Mai Journal of Science** is an international English language peer-reviewed journal which is published in open access electronic format 6 times a year in January, March, May, July, September and November by the Faculty of Science, Chiang Mai University. Manuscripts in most areas of science are welcomed except in areas such as agriculture, engineering and medical science which are outside the scope of the Journal. Currently, we focus on manuscripts in biology, food science, chemistry, microbiology, physics, materials science and environmental science. Papers in mathematics are also included but should be of an applied nature rather than purely theoretical. Manuscripts describing experiments on humans or animals are required to provide proof that all experiments have been carried out according to the ethical regulations of the respective institutional and/or governmental authorities and this should be clearly stated in the manuscript itself. The Editor reserves the right to reject manuscripts that fail to do so.

Papers which have already been published in other journals or which are under consideration by other journals should not be submitted. Similarly, papers published here should not be submitted to other journals. Manuscripts that are suspected to involve plagiarism or other types of ethical misconduct, including but not limited to duplicate publication, multiple submission or salami slicing, will also be rejected. As from 1 January 2022, manuscripts that are submitted on or after this date and have passed successfully through peer review and been accepted will be subject to a publication fee of 350 US\$ (if from overseas) or 10,000 Baht (if from within Thailand) before they can be published.

SPECIAL COLLECTIONS

In the past, the Journal published Special Issues (up to 2 per year) on request but this practice has been discontinued. Special Issues have now been replaced by Special Collections, the difference being that papers in Special Collections do not have to be published in the same regular issue; instead, they can be distributed among different regular issues. However, they can still be brought together as a “Collection” under a separate title and publicized on the Journal website to attract attention. Requests for articles in this category e.g. from the conference should be addressed to the Editor for consideration.

TYPES OF MANUSCRIPT

Manuscripts may be submitted in the form of *Review Articles*, *Research Papers* or *Short Communications* and must be clearly and concisely written in English. As an approximate guide to length:

- *Review Articles* would not normally exceed 50 pages of double-spaced A4 text, inclusive of tables, figures and references, with a maximum of 120 references. Reviews are normally by invitation only but prospective authors are welcome to contact the Editor or appropriate Associate Editor to discuss possible contributions. Please see *Review Article Guidelines* for more information.

- **Research Papers** would not normally exceed 25 pages of double-spaced A4 text, including not more than 5 tables, 5 figures and 45 references.
- **Short Communications** would not normally exceed 10 pages of double-spaced A4 text, including not more than 2 tables, 2 figures and a maximum of 30 references.

Manuscripts that exceed these limits will be returned to the corresponding author for editing.

PREPARATION OF MANUSCRIPTS

Manuscripts submitted for publication will normally consist of the following sections: *Title, Authors Names and Affiliations (including an ORCID ID if possible and an e-mail address for the corresponding author), Graphical Abstract (optional), Abstract (including Keywords), Introduction, Materials and Methods, Results and Discussion, Conclusions, Acknowledgements (if any), Conflict of Interest Statement, and References.* For format and general style, authors should refer to current issues (see also the Journal website) as a guide. ***Manuscripts that do not conform to these guidelines will be rejected at the submission stage.*** Photographs, figures and line drawings should be of optimum quality.

Only references actually cited in the main text should be included in the References section and should be cited in numerical order. Manuscripts should be typed as MSWord documents in single column format using double-spacing on A4-sized pages with justified text. The font type should be Calibri with 11-point font size for the main body of the text. Any tables and figures should follow at the end of the main text and be saved in the same document file. SI units of measurement should be used throughout.

It is strongly recommended that, where appropriate, the paper should be proof-read by a native English speaker, or at least someone proficient in the English language, before being submitted so as to avoid the possibility of rejection on language rather than scientific grounds. The Editor reserves the right to request proof of language editing.

When submitting a manuscript, authors are also required to consider if there is any possible **conflict of interest** involved. If there is no conflict of interest, authors should include the following statement after the Acknowledgements (if any) and before the References.

CONFLICT OF INTEREST STATEMENT

The authors declare that there is no conflict of interest.

SUBMISSION PROCEDURE

Firstly, authors should register in the Thai Editorial System at the following website before commencing manuscript submission.

<https://li04.tci-thaijo.org/index.php/CMJS/index>

Having submitted a manuscript, the system then enables the author to track the manuscript's progress through the review procedure. When submitting a manuscript, authors should provide the following 5 files:

1. A single, all-inclusive manuscript file as a Word file (i.e., including all figures, tables, schemes, etc.) prepared in the correct format of the Journal and including the names and affiliations of the authors, and the ORCID iD and email address of the corresponding author.
2. The same manuscript file as in (1) but as a PDF file with the authors' names and affiliations deleted and with the Acknowledgements section removed. This is the file that will be sent to the reviewers.
3. Other supplementary data (if any).
4. Cover letter to the Editor highlighting briefly the novel aspects of the research.
5. A list of 5 suggested reviewers (with names, affiliations and email addresses).

In providing a list of suggested reviewers, this is not meant to imply that the manuscript will be sent to these reviewers. This is simply a measure designed to avoid long delays in the event that suitable reviewers are difficult to find. Normally, the manuscript will be refereed by 2-3 reviewers.

REVIEW PROCEDURE

Following receipt of the manuscript, it will be first screened for its suitability for the Journal by the assigned Associate Editor. This initial screening also includes the use of 'Turnitin' software for plagiarism detection. Having passed through this initial screening process, it will then be sent to a minimum of two external reviewers (double-blind system). In the event of differences of opinion amongst the reviewers regarding the merits of the manuscript, the final decision will rest with the Editor. The Journal will make every effort to inform the authors of its decision within 3 months after submission and, if accepted, to publish the manuscript within 1 month after the proof has been approved by the corresponding author and the appropriate payment has been made.

Manuscripts accepted but requiring revisions must be returned to the Journal within the timeframe specified by the handling Associate Editor highlighting the changes that have been made.

Detailed responses to the reviewers' comments should also be given in a covering letter. A revised manuscript returned after the deadline has expired without giving prior notice to the handling Associate Editor will be treated as a new submission.

In the case of manuscripts considered to be unsuitable for publication, the reasons for rejection will be clearly explained. In some cases, an article submitted as a *Research Paper* may be recommended for acceptance as a *Short Communication* instead (or vice versa), especially where the work is of topical interest but is of limited scope and length.

Following acceptance, an electronic copy of the paper typeset as it will appear in the Journal (for final proof-reading) and a *Copyright Transfer Agreement* will be e-mailed to the corresponding author. The paper (indicating any final corrections) and the signed *Copyright Transfer Agreement* must be returned as soon as possible. Manuscripts will be published only after receiving the signed *Copyright Transfer Agreement*. Finally, following publication, an electronic copy (PDF file) of the paper can be downloaded from the Journal website free of charge.

PAYMENT

As mentioned at the end of the **EDITORIAL POLICY** section, in order to cover processing costs and provide open access for articles which have been accepted, the Journal now charges a publication fee of 350 US\$ if sent from abroad (which also covers any bank transfer charges) or 10,000 Baht if sent from within Thailand. An invoice will be e-mailed to the corresponding author prior to publication. This publication fee should be transferred to the bank account shown below and details of the transfer e-mailed to <cmjs@cmu.ac.th>

Account Name:	Science and Technology Service Center	SWIFT Code:	SICOTHBK
Account No.:	6672263276	Tax ID / Biz No.:	0994000423179
Bank:	Siam Commercial Bank Public Company Limited	Branch:	Chiang Mai University Branch
Company Name:	Science and Technology Service Center Faculty of Science, Chiang Mai University		
Address:	239 Huay kaew Road, Suthep, Muang, Chiang Mai 50200, Thailand		

COVERAGE BY INDEXING SERVICES

The Journal is covered by the following indexing services:

- Science Citation Index Expanded (also known as SciSearch®)
- Journal Citation Reports / Science Edition
- Scopus
- Biological Abstracts
- BIOSIS Previews
- Chemical Abstracts
- SciFinder Scholar
- Zentralblatt für Mathematik
- MathSciNet
- Thai Citation Index (TCI)
- ASEAN Citation Index (ACI)

JOURNAL WEBSITE / OPEN ACCESS

The Chiang Mai Journal of Science is an open access journal. Full papers in this and past issues are available online for download free of charge at the Journal website at:

<http://epg.science.cmu.ac.th/ejournal/>

JOURNAL IMPACT FACTOR

Science Citation Index Expanded (SCIE), Category: Multidisciplinary Sciences

2023 Journal Citation Reports (JCR) impact factor is 0.60, Quartile 3

OTHER JOURNAL METRICS

2023 CiteScore 2023 is 1.0, Quartile 3, and SCImago Journal Rank (SJR) is 0.192, Quartile 4

DISCLAIMER

Personal views expressed by contributors in their articles are not necessarily those of the *Chiang Mai Journal of Science* or of the Faculty of Science, Chiang Mai University.
